

Paper ID: 119

Paper Title: “Smart Microclimate Estimation System for Energy-Efficient Greenhouse Control”

**Goro TERUMICHI** is a Ph.D. candidate in the Graduate School of Science and Technology, Keio University, Japan. He received his bachelor’s degree in commerce from Waseda University, Japan in 1996. The main theme of his current research focuses on developing an energy control system that makes humans comfortable in indoor environment by combining Control Systems and Deep Learning technologies. He is a visiting professor at the University of Electro-Communications, Tokyo, Japan. He runs his own company group, named ModuleX Group as CEO, that provides lighting and energy solutions.
