Biographical Note

I am a research staff member at the University of La Laguna, currently working on the European project *SatComm*, which focuses on the development of smart energy management solutions for renewable-based energy communities. I am also pursuing a PhD focused on energy management in energy communities. I hold a Master's degree in Industrial Engineering with a specialization in Robotics and Automation, as well as a Bachelor's degree in Industrial Electronics and Automation Engineering from the University of La Laguna. My research interests include renewable energy systems, intelligent energy management, and sustainable infrastructures.
