

ICRERA 2025

**14th INTERNATIONAL CONFERENCE ON RENEWABLE
ENERGY RESEARCH AND APPLICATIONS**

Bernardo Yaser León Ávila

Transilvania University of Braşov, Braşov, Romania

Paper ID: 124

Paper Title: Energy Storage and Management in Battery-free Wireless Sensor Networks

Bio :

(Sancti Spíritus, Cuba, 1984) is a PhD student at Transylvania University of Braşov (UNITBV), Romania. He holds a degree in Telecommunications and Electronics Engineering and serves as an Assistant Professor in the Department of Computer Engineering at the University of Sancti Spíritus, Cuba. His research interests include computer networks, computer architecture, operating systems, and the Internet of Things (IoT). His current work focuses on energy-autonomous, battery-free systems for wireless sensor networks (WSN).
