

**ICRERA 2025**

**14th INTERNATIONAL CONFERENCE ON RENEWABLE  
ENERGY RESEARCH AND APPLICATIONS**

**Asst. Prof. Dr. Marko Bizjak**

University of Maribor, Slovenia

**Paper ID** : 155

**Paper Title** : Assessing vegetation-driven reduction in window solar heat gain using LiDAR-based modelling

**Bio** :

Marko Bizjak is an assistant professor of computer science at the Faculty of Electrical Engineering and Computer Science (FERI), University of Maribor, Slovenia, and a member of the GeMMA Laboratory. His research focuses on environmental modeling, remote sensing data processing, and applications of artificial intelligence. He has published in leading journals and received several awards, including the University of Maribor Recognition for Outstanding Research Achievements.
