

Paper ID 206

Author Bio:

Dr. Surya Teja Kandukuri is a Senior Researcher at [NORCE Research AS](#), based in Oslo, Norway. He is affiliated with the DARWIN research group, which focuses on digitalization and artificial intelligence in engineering systems.

Dr. Kandukuri holds a Master's degree in Control Engineering from TU Delft (2006) and a PhD in Condition Monitoring from the University of Agder (2018). His doctoral research concentrated on predictive maintenance and diagnostics for wind energy systems. With over 15 years of experience, Dr. Kandukuri has developed condition monitoring (CM) solutions across various sectors, including energy, aerospace, marine, and digitalization. He has held positions at GE Global Research, Airbus Defense and Space, Machine Prognostics AS, and Cognite AS. His research interests encompass predictive maintenance, diagnostics, prognostics, and digitalization in engineering systems.
