

ICRERA 2025

14<sup>th</sup> INTERNATIONAL  
CONFERENCE ON RENEWABLE  
ENERGY RESEARCH AND  
APPLICATIONS

**Masaya Kato**

Systems Engineering and Science course, Graduate School of  
Science and Engineering, Shibaura Institute of Technology,  
Saitama, Japan

**Paper ID: 213**

**Paper Title: Risk analysis of fuel procurement costs on small-scale wood biomass power generation (Combined Heat and Power) projects**

**Bio:**

I am a second year master's student at the Graduate School of Shibaura Institute of Technology. In my laboratory, I am studying the field of environment and energy under the supervision of Professor Tomoko Iwata and Specially Appointed Professor Tsuyoshi Yoshioka. My research focuses specifically on woody biomass. Establishing a sustainable and stable supply chain is an urgent priority for expanding the use of woody biomass energy, and I am conducting research that approaches this issue from both forestry and energy perspectives.
