

**Paper ID:** 92

**Paper Title:** Exergy Analysis of Biomass and Solar Based Methanol Synthesis System

**Dr. Merve Ozturk Kirkar**

Dr. Merve Öztürk Kırkar is a faculty member at the Department of Mechanical Engineering at Yıldız Technical University, Istanbul, Türkiye. She received her Ph.D. in Mechanical Engineering from the same university in 2023, focusing on the experimental and theoretical investigation of renewable hydrogen production and its blending into natural gas for domestic applications.

Her main research interests include hydrogen energy, exergy analysis, green ammonia production, and integration of renewable energy systems. She has published research papers in international journals and presented her work at several international conferences. She has also participated in various academic and applied projects related to sustainable energy technologies. She is a member of the National Hydrogen Association of Türkiye and several COST Actions pertaining to sustainable energy systems and decarbonization technologies.
